Lr

Adobe Lightroom

ADOBE LIGHTROOM

Adobe Lightroom (officially Adobe Photoshop Lightroom) is a family of image organization and image manipulation software developed by Adobe Systems for Windows, macOS, iOS, Android, and tvOS (Apple TV). It allows importing/saving, viewing, organizing, tagging, editing, and sharing large numbers of digital images. Unlike Photoshop, Lightroom's edits are always non-destructive by keeping the original image and the edits applied to it saved separately.

OBJECTIVES

The course teaches photographers how to use Adobe Lightroom to process their images.

DESCRIPTION

Adobe Photoshop Lightroom is a photo processor which allows you to view, organize and retouch large numbers of digital images. Lightroom's edits are non-destructive.

LEARNING OUTCOMES

After a successful completion of the course, you will be able to do:

- Import and organize photos.
- Edit and develop photos.
- Adjust images and apply effects.
- Fix common problems.
- Export to Photoshop.
- Create photo books.
- Create slideshows.
- Create layouts for the web and print.

ADOBE INDESIGN

Adobe InDesign is a desktop publishing and typesetting software application produced by Adobe Systems. It can be used to create works such as posters, flyers, brochures, magazines, newspapers, presentations, books and eBooks.

Course Content

Introduction

- InDesign tools
- The InDesign workspace
- The document window
- Using guides
- Viewing modes
- Working with panels
- The Tools panel
- Managing panels
- Working with the Control panel
- Saving your workspace
- Navigating through an InDesign document
- Using the Pages panel
- Changing the magnification of your document
- Working with type
- Entering and formatting type
- Placing and formatting type
- Flowing type
- Using styles
- Applying paragraph styles
- Applying character styles
- Applying object styles
- Working with graphics
- Placing graphics
- Positioning graphics within a frame
- Applying text wrap
- Understanding layers
- Applying effects

Building Documents with Master Pages

- Creating custom page sizes
- Creating a new custom-sized document
- Creating and formatting master pages
- Adding automatic page numbering
- Basing master pages on other master pages
- Overriding master page items
- Adding layout pages
- Adding images and text to the master frames
- Applying master pages to multiple pages

Working with Text and Type

- Adding text to your document
- Creating a text frame
- Changing character attributes
- Changing font and type styles
- Adjusting size
- Adjusting line spacing
- Adjusting character spacing

PROFESSIONAL COURSES

Not only for beginners, this course is a must have training for every professional field. You will be trained how to computerize your daily office work and activities. From writing letters, applications and memos to advance level of techniques in Microsoft Excel for accounting and data analysis.

This professional course contains the following modules:

Microsoft Windows

- Turning on and Logging on
- Desktop and its settings
- Icons and settings
- Creating and Managing Shortcuts
- Drives / Files / Folders
- Working with Different windows
- Copying / Moving files
- Searching Techniques
- Date / Time Settings
- Keyboard / Mouse Settings
- Regional Settings
- Getting Help
- Shutting Down

Microsoft Office Word

- The Environment and Ribbon
- Creating, Storing and Retrieving Files
- Text Editing
- Searching
- Clipboard
- Different Views
- Task Pan

- Working with Toolbars
- Headers and Footers
- Dynamic text
- References
- Using Clipart and pictures
- Diagrams
- Text Box usage
- Importing data form external file
- Inserting other media (object)
- Bookmark
- Linking Text and Documents
- Formatting text and Paragraphs
- Setting up Borders and Shading
- Working with Multiple Columns
- Using Tabs
- Spelling and Grammars
- Thesaurus
- Auto Correct
- Customizing MS Word
- Working with Tabs
- Page setup and Printing
- Shortcut keys

Microsoft Office Excel

- The environment
- The Excel Gridline
- Customizing Excel
- Using Fill
- Searching
- Views and Custom Views
- Working with Charts
- Formatting Cells
- Formatting Rows and Columns
- Conditional Formatting
- Protecting Worksheets
- Goal seek
- Scenarios
- Formula Auditing
- Sorting Data
- Filtering Data
- Subtotals
- Validations
- Consolidation
- Group and Outlines
- Pivot Tables and Charts
- Importing Data
- Page Setup and Printing

Microsoft Office Power Point

- Using wizards
- Grids and Guidelines
- Adding new slides
- Importing Slides
- Background
- Side Design
- Side Layouts
- Side Sorter
- Working with Chart and Tables
- Slide Transitions
- Custom Animations
- Working with Sound
- Running a presentation

Microsoft Office Access

- Orientation
- Create Simple Database
- Sort and Filter Records
- Create Lookups
- Join Data from Different Tables in Query
- Sort and Filter Data in Query
- Perform Calculations in Query
- Create a Form
- Modify the Design of Form
- View and Edit Data in Form
- Create a Report
- Add Controls to Report

- Enhance Appearance of Report
- Prepare Report for Print
- Relational Database Design
- Create Table Relationships
- Create Parameter Queries
- Create Action Queries
- Create Unmatched and Duplicate Queries
- Summarize Data
- Import Data into Access
- Export Data to Text File Formats
- Export Access Data to Excel
- Create Mail Merge
- Data Normalization
- Create Junction Table
- Improve Table Structure
- Create Query Joins
- Join Tables That Have No Common Fields
- Relate Data within Table
- Work with Subdatasheets
- Create Subqueries
- Organize Report Information
- Format Reports
- Include Control Formatting in Report
- Add Calculated Field to Report
- Add Controls to Forms
- Create Sub forms
- Add Sub report to Existing Report
- Organize Information with Tab Pages
- Enhance Navigation of Forms
- Apply Conditional Formatting
- Field and Record Validation
- Form Validation
- Create a Macro
- Create an Event-Driven Data Macro
- Create a Database Switchboard
- Modify Database Switchboard
- Set Startup Options

Microsoft Office Project

- MS Project 2013 - Course Overview
- MS Project 2013 - Introduction
- MS Project 2013 - Key Elements
- MS Project 2013 - Predecessors
- MS Project 2013 - Types of Predecessors
- MS Project 2013 - General Options I
- MS Project 2013 - General Options II
- MS Project 2013 - Customizing Ribbon
- MS Project 2013 - Work Breakdown Structure (WBS)
- MS Project 2013 - WBS Naming Convention
- MS Project 2013 - Recurring Tasks
- MS Project 2013 - Creation & Assigning of Calendar
- Creation and Assigning of Task Calendar
- MS Project 2013 - Critical Tasks
- MS Project 2013 - Status Bar
- MS Project 2013 - Project Information Tool
- MS Project 2013 - Milestone and Estimated
- MS Project 2013 - Early Start & Early Finish and Late Start & Late Finish
- MS Project 2013 - Slack
- MS Project 2013 - Task Constraints
- MS Project 2013 - Link Unlink Tasks
- MS Project 2013 - Use of Templates
- MS Project 2013 - Defining Resources
- MS Project 2013 - Assigning Resources
- MS Project 2013 - Resource Calendar
- MS Project 2013 - Baseline
- MS Project 2013 - Cost
- MS Project 2013 - Update Project Progress
- MS Project 2013 - Earned Value Analysis
- MS Project 2013 - Update Task I
- MS Project 2013 - Update Task II
- MS Project 2013 - Resource Analysis
- MS Project 2013 - Resource Levelling
- MS Project 2013 - Task Inspector
- MS Project 2013 - Slippage
- MS Project 2013 - Filtering
- MS Project 2013 - Grouping

- MS Project 2013 - Highlighting
- MS Project 2013 - Calendar, Gantt Chart and Network Diagram View
- MS Project 2013 - Use of Tables
- MS Project 2013 - Resource Sheet, Usage and Form View
- MS Project 2013 - Team Planner, Timeline and Gantt View
- MS Project 2013 - Cost Report
- MS Project 2013 - Resource Report
- MS Project 2013 - Report Organizer

Urdu Inpage

- Introduction to inpage _ How to Download Inpage
- Page setting _ First user interface
- Urdu Text Formatting
- How to write English in Inpage
- How to save and Export inpage document
- Export and import inpage text format
- Hand tool _ Selection tool _ Rotation Tool
- How to Use Master Page
- Link text chain and other tools

Digital Marketing SEO, SMO

Search Engine Optimization (SEO) is a set of ongoing best practices used for your website and blog to help you get found online via the top search engines like Google, Bing, and Yahoo. These techniques help improve a website's SERP or Search Engine Result Page.

What you'll learn

- MASTER Facebook + Instagram + Messenger Ads & Marketing & SMO
- Get 10k to 100k monthly FREE Visitors with Step by step SEO Guidance

- MASTER dozens of powerful SEO & Social Media strategies to get real results
- Optimize Facebook for SEO & SMO
- Optimize YouTube for SEO & SMO
- Optimize LinkedIn for SEO & SMO
- Optimize Pinterest for SEO & SMO
- MASTER Video SEO & YouTube SEO
- MASTER Mobile SEO & UX Signals
- Increase C-T-R. Use Featured Snippets
- Use the power of Google Rank Brain

GRAPHIC DESIGNING

We will teach you not only the graphic tools but the printing standards and techniques used in the printing industry. Besides this, our professional graphics designing course will also cover the graphics used for Mobile Applications and Website Designs.

This graphics designing course includes the following contents:

Adobe Photoshop Professional

Overview of the Photoshop

- Bitmaps and vectors
- Image modes
- Image size and resolution
- Image color concepts

Basic Tools and Colors

- Overview of the Toolset
- Brushes and brush types
- Advance effects with brushes
- Color using eye dropper
- Numerical color
- Pantone color
- The background image
- Erasing and canvas color

Selection

- Essential shortcuts
- The marquee tools
- Adding and subtracting selections
- Automatic selection using the wand tool
- Auto selection using the quick selection brush
- Manual cut-out techniques
- Transforming a selection
- Understanding selection edge

Layers

- Layer blending modes
- Layer opacity
- Transforming layers
- Working with multiple layers

Layer Masks

- Introduction to layer masks
- Creating a layer mask from a selection
- Modifying a layer mask using the paintbrush tool
- The gradient tool and masks

Image adjustments

- Using adjustment layers
- Levels explained
- Color balance and color considerations
- Hue and saturation
- Changing certain color in image

Projects

- Fixing raw photo
- Creating Visiting Card
- Creating Wallpapers
- Creating Logos
- Different Icons and symbols

Adobe Illustrator Professional

Drawing Basics

- Getting to Know the Work Area
- Coloring concepts and techniques
- Selection and Alignment
- Creating and Editing Basic Shapes
- Transforming Objects
- Drawing with the Pen and Pencil Tools
- Colors and Painting
- Drawing and Illustrations
- Working with Text / Type
- Working with Layers
- Blending Colors and Shapes
- Using built-in libraries
- Working with symbols
- Creating Charts / graphs
- Grids and Guides
- Page Setup

Advance Drawing Concepts

- Working with Perspective Drawing
- Advance drawing with the help of custom brushes
- Advance coloring techniques
- Mixing shapes and creating complex shapes
- Creating Illustration from bitmaps

Styles and Effects

- Introduction to appearance panel
- Working with multiple fills and strokes
- Creating advance effects
- Applying Appearance Attributes and Graphic Styles
- 3D Logos and 3D Objects
- Saving and reusing styles

Working with images / bitmaps

- Working with bitmaps
- Creating vectors from bitmaps
- Creating bitmap effects for vectors
- Working with Linked images

Exporting Graphics

- For printer
- Setting for printing press
- Setting for photo studio
- Creating shapes for Software, Websites and Mobile Apps

Coral Draw Professional

Features of Corel Draw

- Corel Draw Interface
- Tools Box
- Common Tasks

Drawing and Coloring

- Selecting Objects
- Creating Basic Shapes
- Reshaping Objects
- Organizing objects
- Applying color fills and Outlines

Mastering with Text

- Text Tool
- Artistic and paragraph text
- Formatting Text
- Embedding Objects into text
- Wrapping Text around Objects
- Linking Text to Objects

Applying Effects

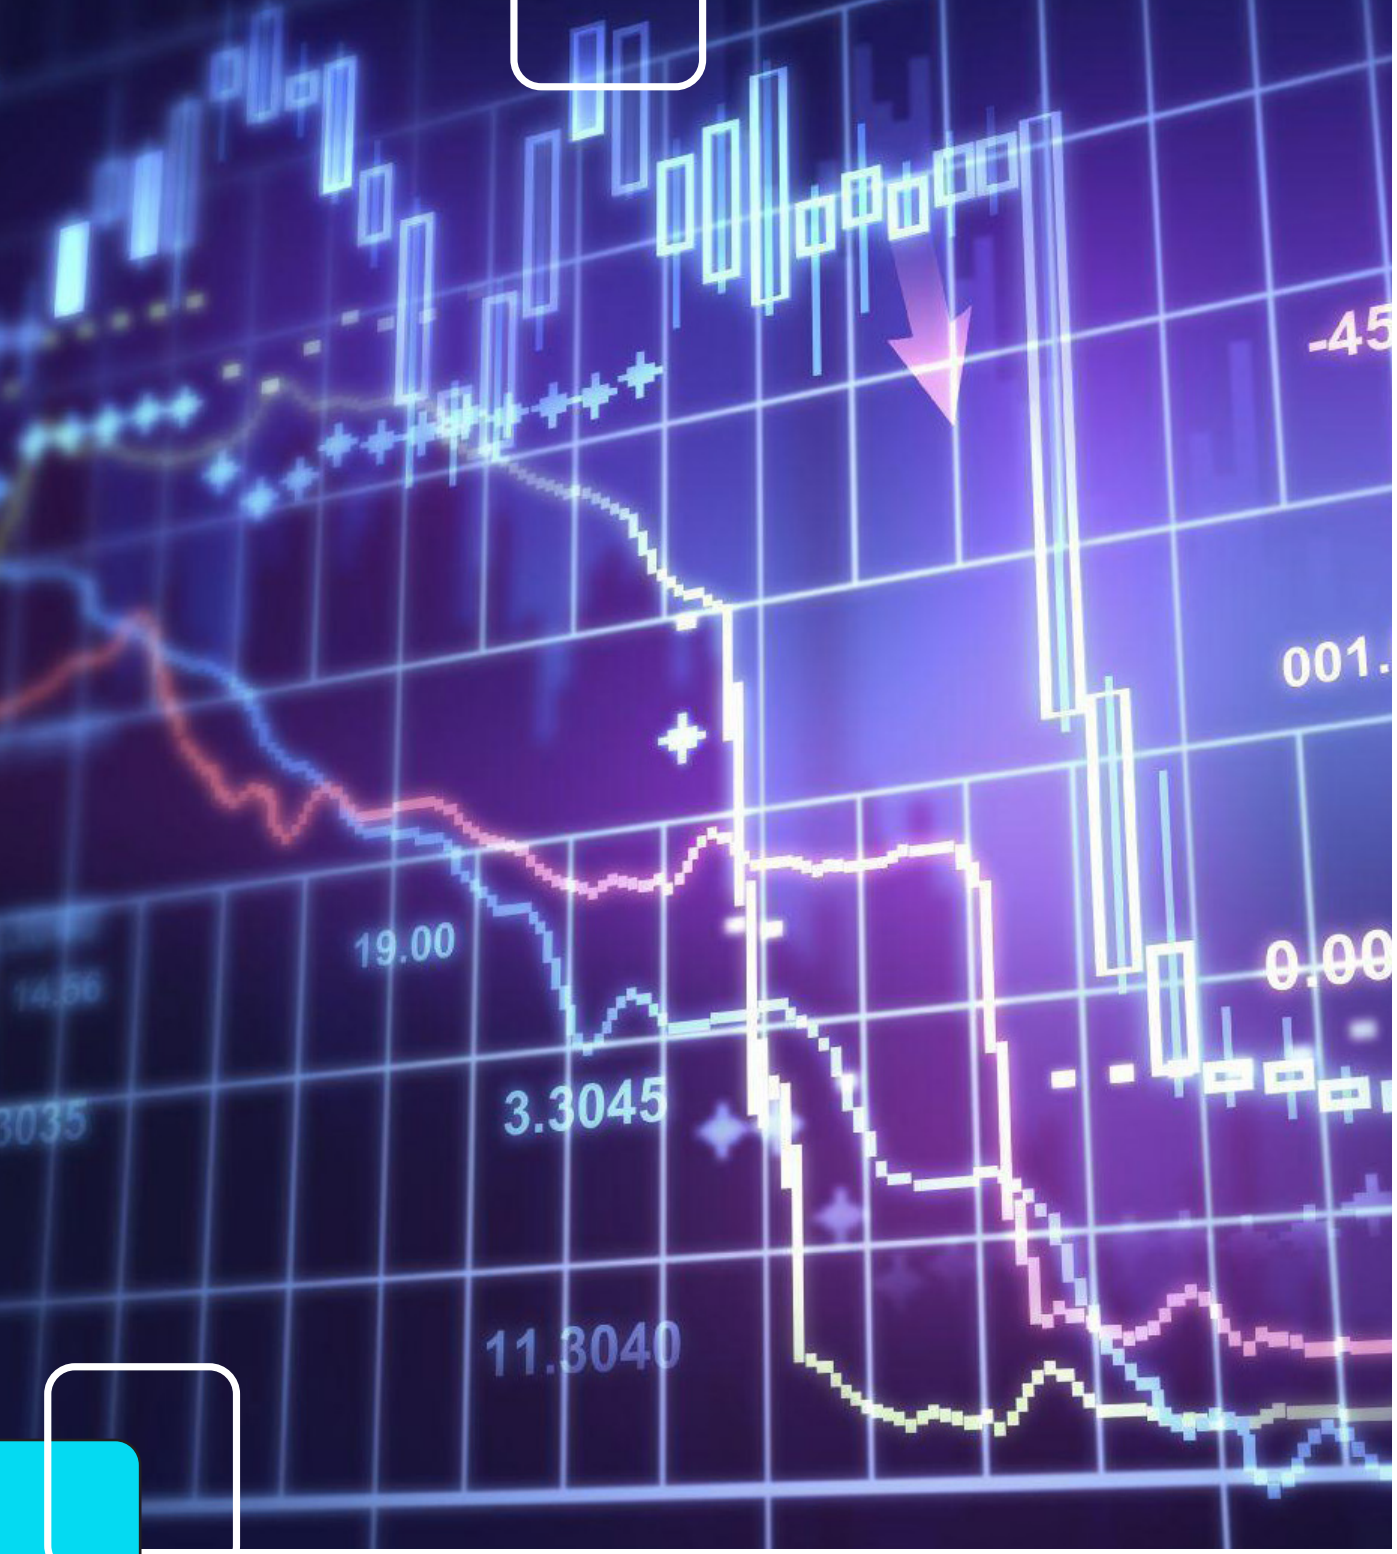
- Power of Blends
- Distortion
- Contour Effects
- Envelops
- Lens effects
- Transparency
- Creating Depth Effects
- Power Clips

Working with Bitmaps

- Working with Bitmaps
- Editing Bitmaps
- Applying effects on Bitmaps
- Creating vector art from bitmaps

Printing Techniques

- For printer
- Setting for printing press
- Setting for photo studio



FOREX

Forex is an international market. The word Forex is an acronym for the term Foreign Exchange. It means exchange of one currency for another on a financial market. Forex trading has been in existence since the 70's of the XX century. It is a fast-growing and one of the most heavily traded markets in the world. The daily online trading turnover on Forex is worth almost 4 trillion US dollars.

What you'll learn

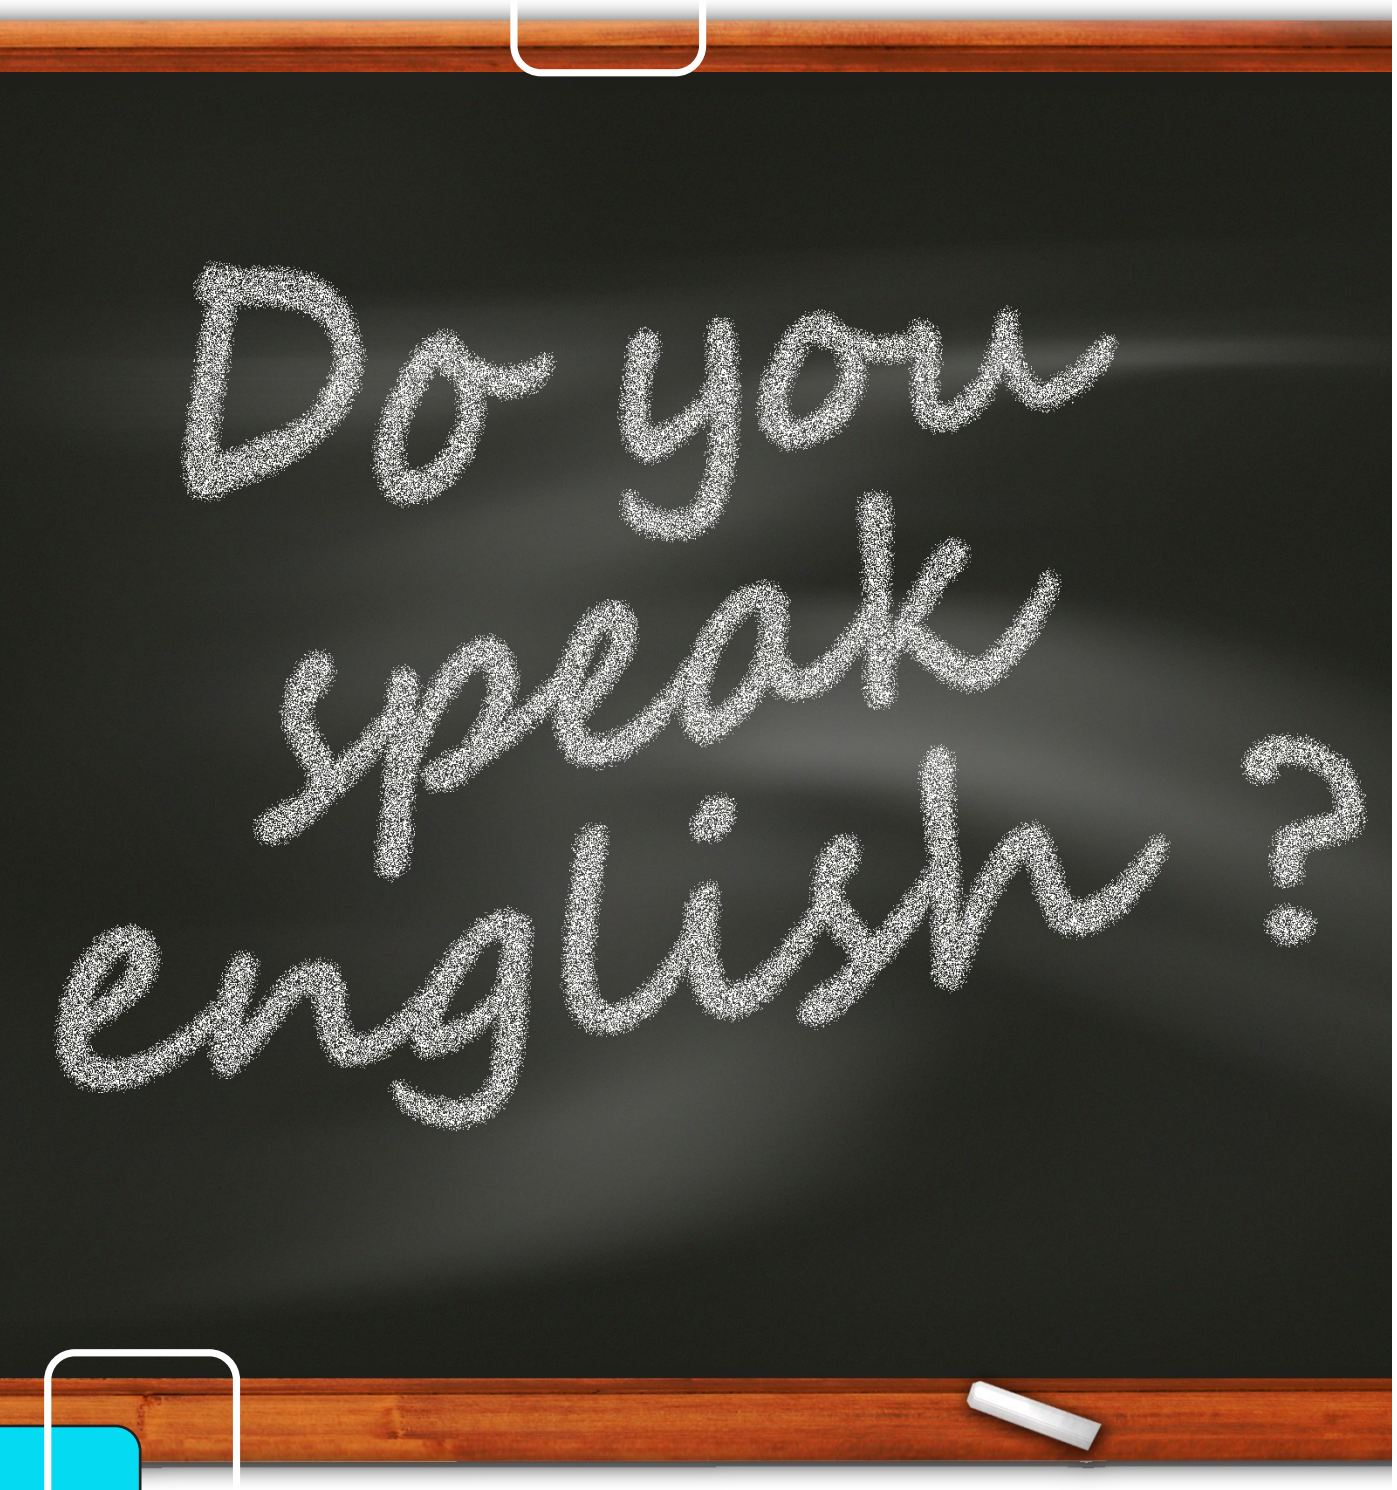
- Types of trends, types of charts and formation rules. Bull and bear speculations
- Types of exchange arrangements, rate of exchange
- Margin trading on Forex market
- Technique of the deals execution
- Introduction to the technical analysis, Dow Theory
- Trend analysis
- Graphical patterns analysis
- Candlestick analysis
- Wave analysis. Elliott Wave Principle
- Mathematical analysis
- The fundamental analysis of foreign exchange market
- Trading systems
- Risk management
- Trading psychology



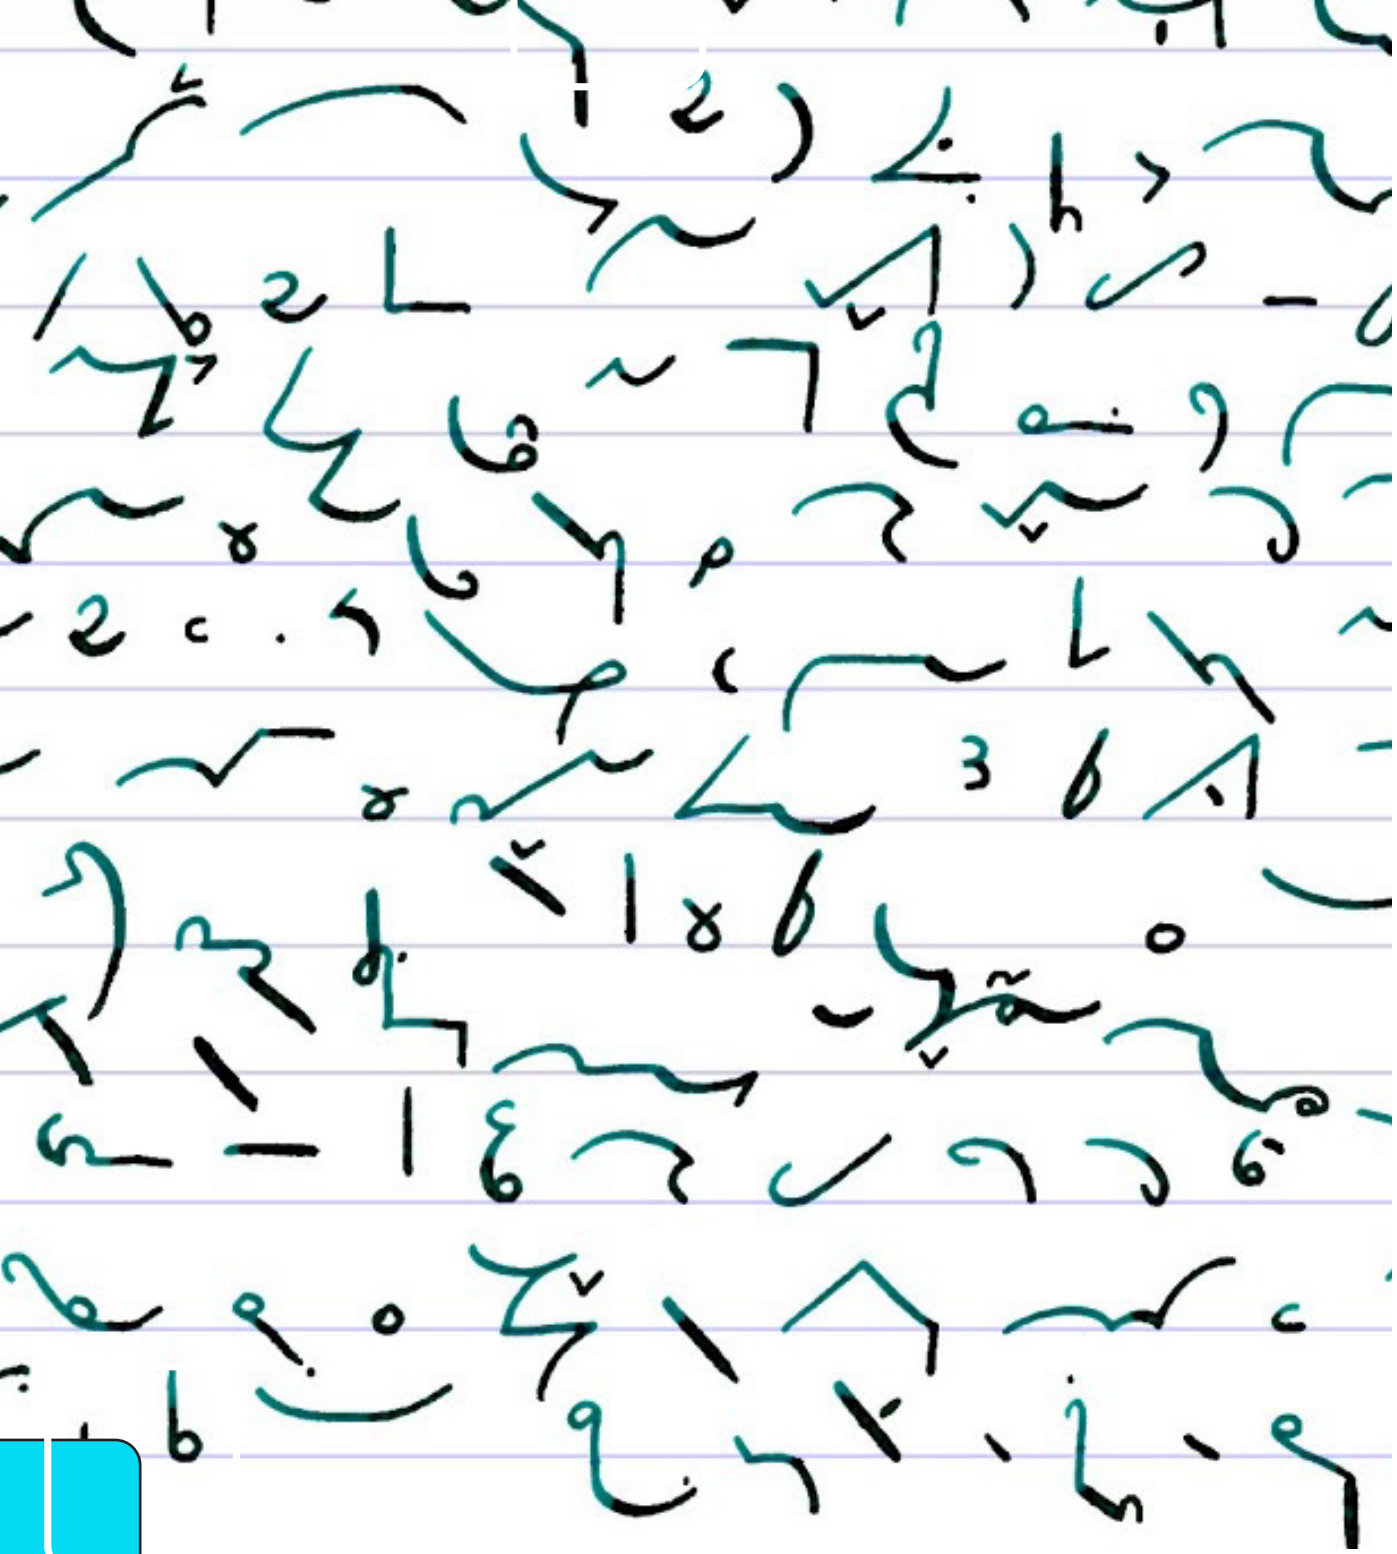
SPOKEN ENGLISH

Spoken English is English which is spoken by people, used in conversations. It will have lots of phrases and incomplete sentences which are 'understood in context.' It is a personal communication, intended for a few. Mostly questions, answers, and short sentences/phrases which express an idea.

What you'll learn

- Introduction
- English Speaking Practice| How To Speak English Fluently
- Daily Use Sentences for English Speaking
- Sentence Structures and How to make sentences in English
- Conversational Sentences of daily use and How To Translate In English
- Use of Gonna & Gotta
- Conversation Among Three People
- How to use Verb & Pronoun while speaking English
- 1000 Conversation Sentences of daily use
- Tense Introduction & Present Indefinite
- Present Continuous Tense
- Present Perfect & Present Perfect Continuous Tense
- Learn Tenses in English Grammar With Examples
- Prefixes & Suffixes- Vocabulary building exercise
- Improve Your Vocab| Prefixes & Suffixes
- How to Describe a person in English
- Describing a personality
- Sentence Structures
- English Speaking Course , Wanna, would like to, about to
- How to give Introduction
- Asking questions on Education, Questions & Answers in English

- Asking Questions in English or How to ask Questions about Hobbies
- How To Introduce Yourself
- Difference Between Proverbs & Idioms
- Easy Way Daily Routine
- How To Tell Daily Routine
- Daily Routine In English- Evening
- English Speaking Sentences of Daily Use
- How to translate sentences into English
- English words With Meaning & Usage-Part 1 How to Grow Word power
- English words With Meaning & Usage-Part 2 How to Grow Word power
- 100 Important Phrases in English| 10 Ways To Say How Are You
- Daily Use Sentences In English Speaking or Conversational Sentences In English
- How To Translate
- How To Translate Sentences Of Daily Use
- How To Grow Word Power
- English For Daily Use



SHORTHAND

Shorthand is an abbreviated symbolic writing method that increases speed and brevity of writing as compared to longhand, a more common method of writing a language. The process of writing in shorthand is called stenography, from the Greek stenos and graphein.

What you'll learn

- Introducing Teeline
- The Teeline alphabet
- Joining letters
- Removal of unnecessary letters
- Position of writing
- Punctuation
- Write shorthand using correct techniques
- Read and write shorthand notes
- Write shorthand at optimum speed (minimum 60 - 80 wpm) with minimum 98% accuracy
- Produce transcripts of shorthand notes.

Video Editing

Video editing is the manipulation and arrangement of video shots. Video editing is used to structure and present all video information, including films and television shows, video advertisements and video essays. Video editing has been dramatically democratized in recent years by editing software available for personal computers.

Premiere Pro CC Course Content

- Nonlinear editing in Adobe Premiere Pro
- Expanding the workflow
- Touring the Adobe Premiere Pro interface
- Setting up a project
- Setting up a sequence
- Importing Media
- Importing assets
- Working with the Media Browser
- Importing images
- The media cache
- Capturing the videotape
- Organizing Media
- The Project panel
- Working with bins
- Organizing media with content analysis
- Monitoring footage
- Modifying clips
- Essentials of Video Editing
- Working with Clips and Markers
- Adding Transitions
- What are transitions?
- Edit points and handles
- Adding video transitions
- Using A/B mode to fine-tune a transition
- Adding audio transitions

- Advanced Editing Techniques
- Four-point editing
- Retiming clips
- Replacing clips and footage
- Nesting sequences
- Regular trimming
- Advanced trimming
- Trimming in the Program Monitor panel
- Putting Clips in Motion
- Adjusting the Motion effect
- Changing clip position, size, and rotation
- Working with key frame interpolation
- Using other motion-related effects
- Multi-camera Editing
- The multi-camera process
- Creating a multi-camera sequence
- Switching multiple cameras
- Finalizing multi-camera editing
- Additional multi-camera editing tips
- Editing and Mixing Audio
- Setting up the interface to work with audio
- Examining audio characteristics
- Adjusting audio volume
- Sweetening Sound
- Adding Video Effects
- Color Correction and Grading
- Exploring Compositing Techniques
- Creating Titles
- Managing Your Projects
- Exporting Frames, Clips, and Sequences

Video Animation

A simulation of movement created by displaying a series of pictures, or frames. Cartoons on television is one example of animation. ... Whereas video takes continuous motion and breaks it up into discrete frames, animation starts with independent pictures and puts them together to form the illusion of continuous motion.

After Effects Pro CC Course Content

- Interface, workspace and getting around
- Basic animation and working with Effects
- Animating text
- Working with shape layers
- Creating an introductory multimedia presentation
- Working with masks
- Distorting objects with the puppet tools
- Working with Illustrator, Bridge and After Effects
- Working with Photoshop
- Rendering and output
- Tracking and stabilization
- Motion stabilization
- Motion tracking
- 3D Features
- Using 3D Features Organizing media with content analysis

WEB DEVELOPMENT

Web designing and development is a fast growing field in Rawalpindi and Islamabad. More technologies are introduced rapidly and we need to keep ourselves up-to-date to compete with others in the market.

The key elements of this course are:

1) Basic of web designing

- Introduction to website designing
- Web Server and Web Browser
- Tools and Editors
- Static website VS Dynamic website
- Comparison of Different Languages and Tools

2) HTML 5

- HTML and XHTML
- Elements & Attributes
- Headings
- Adding and formatting Paragraph Text
- Formatting your website template
- Adding Hyperlinks and Buttons in your website
- Images and its usage
- Image mapping
- Tables and its different usage in web designing
- Bulleted Lists and its professional usage
- Forms and Interface designing
- Creating custom colors using Color codes
- Frames with professional implementation
- Formatting text and using different Fonts
- Adding page information for Google and other webs using Meta tags

3) CSS

- Different methods of creating styles
- Different Coloring options
- Creating and formatting professional Background Effects
- Advance Text effects
- Positioning objects with different Display levels
- The CSS Box model
- Working with Floats
- Using Borders with different effects
- Understanding CSS Outline
- Working with Margins and Padding
- Professional usages of Lists
- Using the z-index
- Creating complex website layouts
- Color Gradients
- Creating your own drop down menu in CSS
- Animations using CSS 3.0
- Responsive Website Designs using CSS 3.0
- Using Custom fonts in your website designs
- Creating different themes for your website

4) Bootstrap

- Understanding bootstrap grid system
- Creating responsive layouts
- Bootstrap Typography
- Bootstrap Tables
- Bootstrap Forms
- Bootstrap Buttons
- Bootstrap Messages
- Bootstrap Navbar
- Bootstrap Drop Down Menus
- Bootstrap Alerts
- Bootstrap Pagination
- Bootstrap List groups
- Bootstrap Wells
- Bootstrap Slider
- Working with image galleries
- Using different themes
- Working with Font Awesome
- Project : Creating a complete responsive website layout using bootstrap

WORDPRESS

WordPress is a content management system based on PHP and MySQL that is usually used with the MySQL or MariaDB database servers but can also use the SQLite database engine. Features include a plugin architecture and a template system

COURSE CONTENT

- Introduction
- Domain & Hosting
- Navigating C-Panel (Your Web Hosting Account)
- WordPress Installation
- WordPress Themes
- Settings
- Plugins
- Adding Site Content
- Landing Page Creation
- Customizing Website Appearance
- Making Your Site Search-Engine-Friendly
- Integrating E-Commerce into Your WordPress Site
- Website Backup and Maintenance
